

HIGHWAY LEGENDS MINUTES TO DATE MAY 27, 2009

Thank you for your patience. I will be brief as all of this info is old news. We do want it as a matter of record. I am unofficially secretary along with being HYL founder with other duties. That is ok because HYL is my dream which I have passed along to family and all of you. We are growing fast and there is always catch up work to do. Thank God for David and Nickie and the volunteers who help me with my ideas!

Our first public meeting was held at Mike and Cathy's garage where my initial thoughts were made known. Everyone liked what was presented. The main theme was a club with no dues and no rules, meaning no rules for this or that vehicle, year or condition. A person is invited even without a vehicle. A legend is what you make it in addition to the well known brands. A legend is usually after the fact and is made by someone or event. Check out the definition of legend in the ap or on line above. I also presented the idea of focusing on a family night where your kids or grand kids can have fun at the cruise in. The last Thursday of every month is now officially kid's night with Gabby doing honors in addition of being President of kids club. We will be introducing adopt a kid program. This is where you bring the neighbors kids or who ever you want to the cruise and share the hobby with them. More on this to come. I actually need a couple of you to work with me on this to share this program with schools and churches. During the fall and winter months we plan on having informational meetings on various automotive projects. Several auto businesses have expressed interest in working with us. These folks may be offering discounts to card carrying members.

Our April meeting was a repeat of items discussed, but what was different; we had a room full of excited supporters! It was decided to have cruise ins every Thursday night. We discussed the idea of having driving challenges on site for those who wanted to test their skills. Some of these activities are soon to be. The balance beam is one for the trucks but Rob Lewis took the challenge with a car. I will be providing a monthly newsletter in print and on this site, but only if I have worth while info. Other ideas considered were parades, progressive suppers, Saturday morning breakfast events, road rally and various places to visit.

The June 20th sock hop, cruise in is very important. More on this in the next newsletter. PLEASE. WE NEED YOUR HELP. LOTS OF VOLUNTEERS NEEDED.

That's it for now but don't call me madam secretary.

Ron
