Dear Highway Legend members and guests:

By the time you read this, the 4th of July will have come and gone. Some of you had family picnics, some of you went camping, some went to a car show, family trips or sat on the back porch. Some of us waxed our rides and dreamed about what we wanted to modify, change or the next project that we would like.

I want to thank the men and women who have served in the military and those who are presently serving. Many thanks and God bless you in the pursuit of your dreams. I believe in priorities that places God 1st, country 2nd, and family 3rd. In our politically correct society of garbage thinking those statements are foreign and probably threatening to those who hold beliefs that are contrary to that order and I say you have a right to the wrong. We live in the freest, best country in America. Sure we have problems. Problems and obstacles are opportunities for change and success. There is a strong movement to take our freedoms away and replace it with socialism with a flavor of Marxism

There is a movement for a one-world government and a currency to go with it. Fight it – It's not good. America is free because the first settlers that came here fell on their knees, gave thanks to God and then dedicated this new land back to him. Now it's up to us to keep our freedom by electing men and women who share our principles. All it takes to lose a country is for good people to do nothing.

There is a movement in America to take away our rides, our hobbies. SUV's will be a thing of the past. We got back Camaro's, Cudas's and Mustangs, but for how long? This president and segment of both parties are anti cars. They won't allow us to drill for oil in our own country, thus helping to destroy our economy. I have a "T" shirt that will be available soon that says:

"Foreign oil in American muscle cars---Who signed that deal?"

Ford sales are down approximately 10%, GM 33%, Chrysler 44% (% are rounded off). Ford is the only one that hasn't taken government money and I say (as a Chevy guy) Go Ford! Ford keep your independence and dominate. I believe with the government intervention in GM, GM is doomed. People don't understand that the role of government is the protection of its people and borders, not all of these give away programs. Keep the military strong with the best of everything. A strong military insures a strong nation. And GM sells the Hummer to China. When did common sense stop being common? OK, I've vented. Either you agree or have a different opinion. Maybe the only thing we agree on is our hobby and how we enjoy it.

When we started Highway Legend Club we made it known that we wanted your comments and suggestions. The following ideas have been presented for your comments. Please give us an email on your thoughts.
